

# Stop wasting time and water!

## Rinse-o-matic™

Operation is simple, just place the blender container upside down over the Rinse-o-matic tower and press down. Instantly, water under high pressure shoots into the container and rinses away residue completely. It only takes five seconds to have a residue free container. The results are perfectly clear!

### Powerful

Spray head is equipped to spray with 7 times more force than the competition. This equates to more power to remove stubborn residue.

### Designed with you in mind

The Rinse-o-matic is quality engineered with a basic design that makes it easy to use in any application – perfect for high volume establishments such as smoothie shops, coffee houses, bars and restaurants.

### Convenient

Rinse-o-matic comes with a Y-connector which allows the operator to continue to use the faucet even when the Rinse-o-matic is hooked up to it.

### Easy

No expensive plumbing installation or confusing instructions. Operators can easily install it themselves within minutes.

### Durable

The Rinse-o-matic is made from virtually unbreakable ABS plastic, a strong durable material light enough for effortless transportation from sink to sink.

## Additional Rinse-o-matic™ features:

### One size fits all

Rinse-o-matic works with any manufacturer's container (2.0 L or less) as well as any standard size sink.

### Save money

Operates entirely on cold tap water. There is never wasted water because the water is rationed out only during usage – resulting in lower monthly water and electric bills.

### Safe and easy to use

Without moving parts or electricity, repairs can be made by the operator, which eliminates costly extended downtime.

Fits any standard size sink!  
Installs in three easy steps and includes all of the necessary parts so the Rinse-o-matic can be ready and working for you in minutes!

# The Choice is Clear and Simple.

rinse-o-matic™

*Rinse-o-matic™ blender  
container rinser from  
Vita-Mix®, rinses effectively  
in seconds.*

*Before the container rinser  
there was only one way to  
rinse out containers, the slow  
and tedious process of doing  
it by hand in the sink. But  
now there is a much faster  
and better way to do the job,  
with the Rinse-o-matic. Any  
manufacturer's 2.0 L or smaller  
blender container can be  
rinsed effectively in seconds  
allowing servers to perform  
other tasks.*
